

# Fifty Largest RCRA Hazardous Waste Management Facilities, 2007

Report run on: October 23, 2009 - 2:08 PM

Version 5.0

## User Selection Criteria

**Location:** Florida

**BR Cycle:** 2007

## Results:

Data meeting the criteria you selected follows.

Total Pages: 2

## Report Description

This report lists the fifty largest RCRA hazardous waste managers within the handlers selected (State or National). The managers are ranked high to low based on their total RCRA hazardous waste managed. The EPA handler ID, handler name, site location city, and total quantity of RCRA hazardous waste managed (in tons) are provided for each management facility. There may be less than fifty facilities listed due to the State having less than fifty management facilities.

All managed quantities refer to the managed and received quantities in the National Biennial RCRA Hazardous Waste Report. Facilities and quantities are limited by the following criteria: the waste was managed by a site that has been flagged for inclusion in the National Biennial RCRA Hazardous Waste Report, the waste managed has also been flagged for inclusion in the National Biennial RCRA Hazardous Waste Report, the managed quantity was greater than zero, and the waste was managed in a system other than storage or transfer (management method <> H141).
